

FM-Eco3 GPS/GSM Terminal Vehicle Tracking Device

Device Features:

- View when ignition is ON or OFF
- Monitor fuel consumption
- See when battery voltage is falling
- Can support 2 analogue fuel sensors
- FM-Eco3 has additional inputs and outputs which control and monitor other remote objects
- Designed and manufactured in EU
- Device failure rate <0,2%
- Any element event triggers (external sensor, input, speed, temperature, etc.)
- Smart profile switching (GSM operator or any element depended)
- Highly configurable data acquisition and sending
- Real-time process monitoring
- Authorized number list for remote access
- Firmware update via GPRS or Mini USB port
- Configuration update via GPRS, SMS or Mini USB port

FM-Eco3

Technical Features:

- GPS Ublox module (with external GPS antenna)
- GPRS/GSM Simcom module (with internal GPS antenna)
- Motion sensor
- Micro vibration sensor
- Fuses External fuse (mounted into +BAT wire)
- Mini USB Mini USB socket
- SIM Sim card holder with lock

TCP/IP or UDP/IP protocol support

- Available with GPS/GLONASS
